

# MycoApply® Endo

MycoApply® Endo mycorrhizal granular inoculum consists of 4 carefully selected species of endomycorrhizae. About 80% of the world's plant species form with these types of mycorrhizae. These beneficial fungi greatly increase the effective rooting area of plants thereby enhancing plant growth, vigor and tolerance of environmental extremes. MycoApply® Endo is a granular material containing mycorrhizal fungi that colonize roots and extend into the surrounding soil forming an essential link between plant and soil resources. They greatly increase the root's ability to absorb water and nutrients, while improving plant survival, vigor and health.

## The MycoApply® Difference

### Reduces

- Drought stress
- Water inputs
- Transplant shock
- Nutrient loss

### Increases

- Yields
- Fruiting & flowering
- Survivability

### Promotes

- Rooting
- Nutrient uptake
- Self sufficient plants

## Directions

Industry	Rates: The goal is to create physical contact between the inoculant and seed/root
<b>Restoration</b>	Inoculum can be hydromulched or banded in rows with seed during planting at 20 lbs. per acre. Use 40 to 60 lbs. per acre to broadcast or roto-till before planting.
<b>Turf</b>	Apply during installation or aerification of turf. During installation or aerification of turf use .25 to .5 pound per 1000 sq. ft.
<b>Nurseries</b>	Inoculum can be mixed in planting soil before/during filling cavities, pots, and trays. May be mixed with mechanical equipment that allows passage of a #8 screen (2.5mm) or larger particles. For propagation: Use 2-6 pounds per cubic yard, depending on cavity size (higher rates for smaller cavities).
<b>Plantings</b>	Apply in furrow 1 teaspoon per row foot; Cuttings-1/2 teaspoon under each cutting; Potted Transplants- Use 1-2 tablespoons per gallon planting size; Ball and Burlap plantings - Use 0.5 to 1.5 ounces per inch of stem caliper.
<b>Agriculture</b>	Band or mix with seed at 2 lbs/acre.

## Ingredients

Ingredient	Amount
<b>Endo's</b>	Glomus intraradices, G. mosseae, G. aggregatum, G. etunicatum: 60,000 propagules/lb.

**Disclaimer:** Statement of Claims: MA, Inc. certifies that this product contains the indicated mycorrhizal fungi and propagule rates stated on the label. The mycorrhizal symbiosis is sensitive to environmental conditions and MA, Inc. is unable to make guarantees beyond the above statements. Rev: 11-12-2011
