

Yield: Tonnes / hectare

Average Tuber Count 60 days after planting.

Yield / unit of fertilizer:

**MycoApply® increases potato yields and fertilizer efficiencies-2015**

**\*Plot 1 (control):** NPK fertilizer @100 units N; 150 units P; 300 units K, respectively per hectare. **No MycoApply®.**

**\*\*Plot 2:** Control inputs + liquid gypsum @ 20L/ha + fulvic acid @ 5L/ha + MycoApply®

**\*\*\*Plot 3:** Control inputs reduced (**30% less N and 70% less P**) + liquid gypsum @ 20L/ha + fulvic acid @ 5L/ha + MycoApply®.

**\*\*\*\*Plot 4:** Control inputs + MycoApply® only.

**Note:** treated plots received MycoApply® Ultrafine powder applied to seed @ 3 kg / hectare.
